

Feeling stuck?

Mental Health Clinicians

What do you do when clients aren't progressing as expected, and you've tried it all? How do you move forward to support them?

Here's the piece that often gets left out of training: prenatal alcohol exposure (PAE) is FAR more common than most of us learned in school, and most people who have it were never diagnosed. That gap may already be sitting in your caseload.

The Community of Practice is a free, monthly peer consultation and reflection group for mental health clinicians. Offered in partnership by FASD United and CanFASD, the group meets virtually on the last Thursday of every month starting in September 2026, and provides clinicians a space to learn alongside others doing the same work.

Join the conversation on September 24th at 2:00 pm Eastern by registering in advance at: <https://bit.ly/MentalHealthCOP>
